New Trade Compliant Liebert GVG2 UPS – Stimulus/ARRA Ready

You can now sell these Liebert GVG2 UPS Systems under Stimulus/ARRA, as well as any federal contract vehicle available to support DoD or civilian agencies such as GSA, ITES 2 or SEWP IV. The Liebert GVG2 is the most reliable double-conversion UPS on the market – rack-mountable, network-connectable and extended battery available. Just one of the many compliant power, cooling, monitoring and rack products to choose from.

Model Number	Rating	Battery Runtime Full/Half Load	
GVG2-1500RT120	1500VA/1050W	7 / 20 min	
GVG2-2000RT120	2000VA/1400W	6 / 14 min	
GVG2-3000RT120	3000VA/2100W	5 / 16 min	
GVG2-144BATKIT	Battery cabinet extended runtime	5 / 14 min	

Shown: Base battery runtime

Maximize Your Profit Potential

Leverage the dynamic, sweeping changes in the IT industry. Your government customers need your help and our products to create the computing outcomes they demand.

Improving Energy Efficiency – Liebert products from Emerson Network Power can reduce data center energy costs 30–60 percent.

Consolidation and Virtualization – Often means greater density, more power and heat and higher availability requirements. Put our cooling, power and monitoring systems to work.

IP Telephony – Movement to VoIP means more power, more cooling and greater criticality. We have everything needed to ensure success.

Enhanced Security – Can mean opportunities to harden the data center. This can mean greater power protection, monitoring and uptime requirements.
